Product Bulletin Corroform

DESCRIPTION

Corroform is an eco-friendly water soluble metal forming lubricant which combines lubricity, corrosion inhibition, novel non polluting EP additives and is FDA CFR 21 compliant, in the sense that raw materials are chosen that meet worker health and safety concerns. The product is essentially non-hazardous and contains no oils or Volatile Organic Compounds (VOC), which pertain to emission regulations of the Environment Protection Act.

PRODUCT BENEFITS

1. **Corroform** is used as a dilution in water ensuring a high coverage rate with consequent excellent cost effectiveness.
2. **Corroform** has been specifically designed to protect ferrous metals after forming, no need to oil or degrease.
3. **Corroform** utilises only raw materials that are found in the FDA CFR21 list hence it's safe and clean working nature.
4. **Corroform** can be applied by conventional spray equipment as a rapid application system or be implemented in the works process so as to be "in line," with the assembly.

APPLICATION

Brush, roller or conventional spray equipment easily applies **Corroform**. Parts may also be treated by immersion prior to metal forming. The product will find application wherever there is a need for highly effective corrosion protection and forming of metal parts or equipment.

PACKING AND HANDLING

Corroform is packed in 25 Kg drums. The product should be stored in a cool dry place out of direct sunlight. Minimise exposure by good industrial hygiene practices. Use the necessary personal protection equipment.
